

Gahahaha!
I found you,
kitties!!

Leave him be.

This way, those
idiots back home
who shove that kind
of faal into a delicate
place like this will
understand.

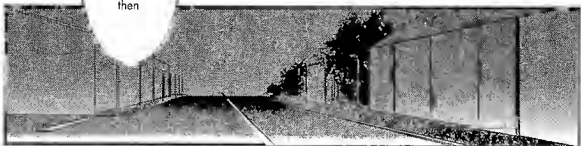

On the other hand,
once he starts shaaating,
tell the MP to hove
him arrested...

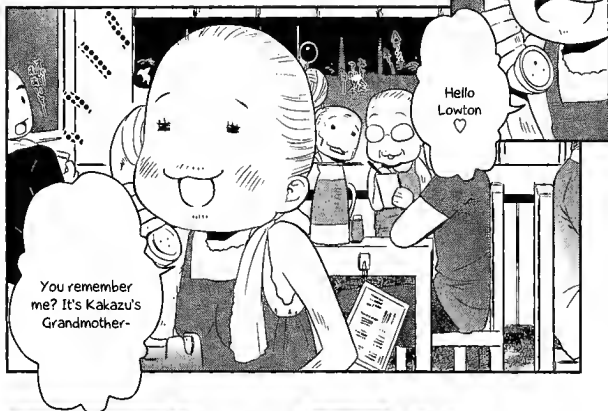

※ MP (Military Police)

HELLO
LOWTON?

The stone circle at
the basement of the base
which was classified for
a long time...

Every time America
wages war, several American
soldiers around the area had
gone missing...

She revealed the
reason and had it
under control.

That person cleared
away the nightmare that
was stuck in my head
since Vietnam...

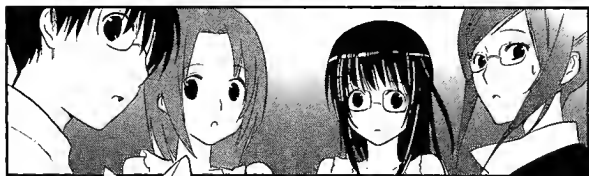

At that time, I felt
for the first time an
indescribable fear that
I didn't even feel on
the battlefield...!!

No matter
what!!

We must not
disobey her!!

Excuse me,
please hold on
a moment.

Yes, I
am.

Here, come
gather

... Are you
able to do
that?

So,
in short

We have to
eliminate those
battle machines,
right?

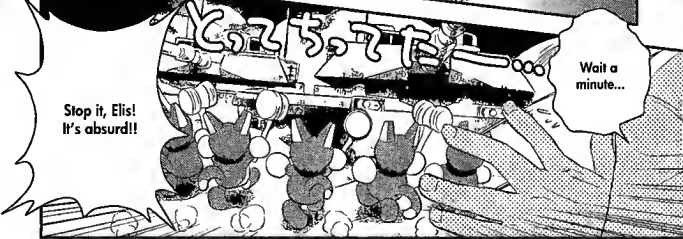

Now, charge
towards the
targets!!

Everyone,
prepare for
disarmament!!

Stop it, Elis!
It's absurd!!

Wait a
minute...

It's okay!!

I'm
going with
them too.

Elis!!

Even now, I
still think it
could be a
dream.

It's already
August, and
Okinawa is in
the middle of
Summer.

But I still
don't get what
he meant.

The commander of
the base unduly
asked for hand-
shakes and said
"Please give my
regards to your
grandmother and
the others",

My uncle seemed to
understand, though.

After that, we
were just able
to walk out
through the
front gate.

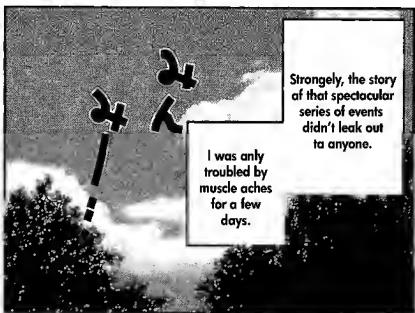

Manami-chan seems to have stopped studying for a civil-service examination.

She's still keeping her distance from Elis; she probably feels guilty for attacking her.

Futaba-san left the weekly apartment she was living at and moved over to an apartment near our home.

It seemed something happened, but she wasn't in the mood for me to casually ask about it...

And...

Strangely, the story of that spectacular series of events didn't leak out to anyone.

I was only troubled by muscle aches for a few days.

Please let
us poss.

We just
want to get out
of here, and we
seek nothing
else.

With pseudo-pair-
annihilation, it
annihilates
inorganic
materials.

These guys each
have a pseudo-
anti-matter
hammer.

I already
copied most of
the materials

Well, the
thing is...

And sent
out a report
just now.

Are you okay
not going to the
library today?

I hope days like
this will continue...

In any case,
I'm glad Elis
and the others
are fine.

You mean
your investigation
is over now...?

Huh...
Then...

Elis...
Are you going
back now?

Yeah. I
see...

We should call
the others and hold
a farewell party...

Thank you
very much.

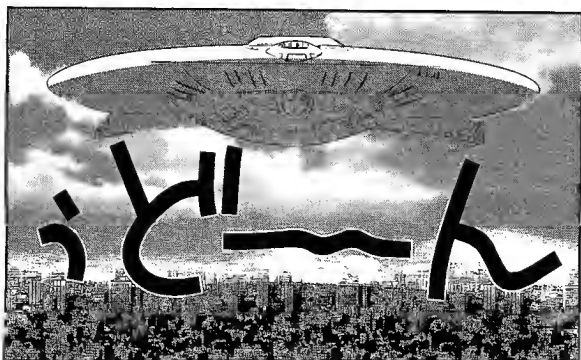

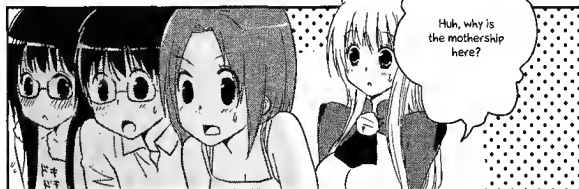

Many things
happened after
coming to
Earth...

but thanks to
Kio-san and the
others, it was
really fun.

あそびに
いくヨ!
